### SUMMER MATH ASSIGNMENT FOR STUDENTS ENTERING GRADES 1

While the summer is a great time for students to have fun, relax, and enjoy themselves, it is also a perfect time for brushing up on math skills. Often the first couple of months of the school year are spent reviewing skills that students were taught previously, when teachers would prefer to move forward and cover new content so students can experience more success in the classroom.

We have implemented a summer math initiative. Therefore, the students entering 1st grade are asked to work on a review of skills at their appropriate grade level.

Also included is information on a math app you can download for your child in Grades 1-4. "**Bedtime Math**" has word problems to keep your child busy all summer long.

Parents are encouraged to review the assignments with their child to ensure that it is completed. Your child's grade level mathematics assignment is attached to this notice. This information is also posted on the district's website.

If there are any questions during the summer, please contact me at the number above. Thank you in advance for supporting this educational endeavor and affording our students the best education possible.

Yours in Education,

*Jennifer Murray*
